

sulphur dioxide

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

Reference number: D-SO2-113

Issue date: 1/8/2015 Revision date: 1/5/2023 Supersedes version of: 12/4/2019 Version: 0.3

Danger

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name : sulphur dioxide
SDS no : D-SO2-113
Other means of identification : sulphur dioxide

CAS-No. : 7446-09-5 EC-No. : 231-195-2 EC Index-No. : 016-011-00-9

REACH registration No : 01-2119485028-34

Chemical formula : SO2

1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses : See the list of identified uses and exposure scenarios in the annex of the safety data sheet.

Perform risk assessment prior to use.

Uses advised against : Consumer use.

Attention: These products must not be applied to humans or animals unless they are

expressly designated as medical or medicinal gases!.

Uses other than those listed above are not supported, contact your supplier for more

information on other uses.

1.3. Details of the supplier of the safety data sheet

Messer Industriegase GmbH GmbH

Messer- Platz 1

D - 65812 Bad Soden am Taunus

Germany

T 0049-(0)-6196 7760-200 - F 0049-(0)-6196 7760-280

SDB.de@messergroup.com - www.messer.de

1.4. Emergency telephone number

Emergency telephone number : Messer Produktionsgesellschaft Salzgitter GmbH +49 (0) 5341 21-9333, erreichbar

Montags 0:00 bis Sonntags 24:00

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP]

Physical hazards Gases under pressure: Liquefied gas H280
Health hazards Acute toxicity (inhalation:gas) Category 3 H331
Skin corrosion/irritation, Category 1, Sub-Category 1B H314
Serious eye damage/eye irritation, Category 1 H318

Messer Industriegase GmbH Messer- Platz 1 D - 65812 Bad Soden am Taunus Germany, 0049-(0)-6196 7760-200 DE - en

sulphur dioxide

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Reference number: D-SO2-113

2.2. Label elements

Labelling according to Regulation (EC) No. 1272/2008 [CLP]

Hazard pictograms (CLP)

GHS04

GHS05 GHS06

Signal word (CLP)

Hazard statements (CLP) H314 - Causes severe skin burns and eye damage.

H280 - Contains gas under pressure; may explode if heated.

H331 - Toxic if inhaled.

EUH071 - Corrosive to the respiratory tract.

Precautionary statements (CLP)

- Prevention : P280 - Wear protective clothing, eye protection, face protection, protective gloves.

P271 - Use only outdoors or in a well-ventilated area.

P260 - Do not breathe gas, vapours.

P264 - Wash hands, forearms and face thoroughly after handling.

- Response : P321 - Specific treatment (see supplemental first aid instruction on this label).

P304+P340 - IF INHALED: Remove person to fresh air and keep comfortable for breathing.

P310 - Immediately call a POISON CENTER, a doctor.

P301+P330+P331 - IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

P303+P361+P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing.

Rinse skin with water or shower.

P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove

contact lenses, if present and easy to do. Continue rinsing.

- Storage : P403+P233 - Store in a well-ventilated place. Keep container tightly closed.

P405 - Store locked up.

P410+P403 - Protect from sunlight. Store in a well-ventilated place.

- Disposal considerations : P501 - Dispose of contents and container to an appropriate treatment and disposal facility in

accordance with applicable laws and regulations, and product characteristics at time of

disposal..

2.3. Other hazards

The substance/mixture has no endocrine disrupting properties.

SECTION 3: Composition/information on ingredients

3.1. Substances

Name	Product identifier	%	Classification according to Regulation (EC) No. 1272/2008 [CLP]
sulphur dioxide	CAS-No.: 7446-09-5 EC-No.: 231-195-2 EC Index-No.: 016-011-00-9 REACH registration No: 01-2119485028- 34	100	Press. Gas (Liq.), H280 Acute Tox. 3 (Inhalation:gas), H331 Skin Corr. 1B, H314 Eye Dam. 1, H318

DE - en

sulphur dioxide

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Reference number: D-SO2-113

Contains no other components or impurities which will influence the classification of the product.

3.2. Mixtures

Not applicable

SECTION 4: First aid measures

4.1. Description of first aid measures

- Inhalation : Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep

victim warm and rested. Call a doctor. Perform cardiopulmonary resuscitation if breathing

stopped

- Skin contact : Remove contaminated clothing. Drench affected area with water for at least 15 minutes.

In case of frostbite spray with water for at least 15 minutes. Apply a sterile dressing. Obtain

medical assistance.

- Eye contact : Immediately flush eyes thoroughly with water for at least 15 minutes.

- Ingestion : Ingestion is not considered a potential route of exposure.

4.2. Most important symptoms and effects, both acute and delayed

May cause severe chemical burns to skin and cornea. Suitable first-aid treatment should be

immediately available. Seek medical advice before using product.

Prolonged exposure to small concentrations may result in pulmonary oedema.

Material is destructive to tissue of the mucuous membranes and upper respiratory tract.

Cough, shortness of breath, headache, nausea.

See section 11.

4.3. Indication of any immediate medical attention and special treatment needed

Obtain medical assistance.

Treat with corticosteroid spray as soon as possible after inhalation.

SECTION 5: Firefighting measures

5.1. Extinguishing media

- Suitable extinguishing media : Water spray or fog.

Product does not burn, use fire control measures appropriate for the surrounding fire.

- Unsuitable extinguishing media : Do not use water jet to extinguish.

5.2. Special hazards arising from the substance or mixture

Specific hazards : Exposure to fire may cause containers to rupture/explode. Hazardous combustion products : None that are more hazardous than the product itself.

5.3. Advice for firefighters

Specific methods : Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat

radiation may cause gas receptacles to rupture. Cool endangered receptacles with water spray jet from a protected position. Prevent water used in emergency cases from entering

sewers and drainage systems.

If possible, stop flow of product.

Use water spray or fog to knock down fire fumes if possible.

Move containers away from the fire area if this can be done without risk.

Special protective equipment for fire fighters : Wear gas tight chemically protective clothing in combination with self contained breathing

apparatus.

Standard EN 943-2: Protective clothing against liquid and gaseous chemicals, aerosols and

solid particles. Gas-tight chemical protective suits for emergency teams.

Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full

face mask.

Messer Industriegase GmbH DE - en
Messer- Platz 1 D - 65812 Bad Soden am Taunus
Germany, 0049-(0)-6196 7760-200

sulphur dioxide

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Reference number: D-SO2-113

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : Act in accordance with local emergency plan.

Try to stop release. Evacuate area.

Ensure adequate air ventilation.

Prevent from entering sewers, basements and workpits, or any place where its

accumulation can be dangerous.

Stay upwind.

See section 8 of the SDS for more information on personal protective equipment

For emergency responders : Wear self-contained breathing apparatus when entering area unless atmosphere is proved

to be safe.

Use chemically protective clothing.

Monitor concentration of released product.

See section 5.3 of the SDS for more information.

6.2. Environmental precautions

Reduce vapour with fog or fine water spray.

Try to stop release.

6.3. Methods and material for containment and cleaning up

Hose down area with water.

Keep area evacuated and free from ignition sources until any spilled liquid has evaporated

(ground free from frost).

Wash contaminated equipment or sites of leaks with copious quantities of water.

6.4. Reference to other sections

See also sections 8 and 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Safe use of the product

: Installation of a cross purge assembly between the container and the regulator is recommended.

Purge system with dry inert gas (e.g. helium or nitrogen) before gas is introduced and when system is placed out of service.

Avoid exposure, obtain special instructions before use.

The product must be handled in accordance with good industrial hygiene and safety procedures.

Only experienced and properly instructed persons should handle gases under pressure.

Consider pressure relief device(s) in gas installations.

Ensure the complete gas system was (or is regularily) checked for leaks before use.

Do not smoke while handling product.

Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt.

Avoid suck back of water, acid and alkalis.

Do not breathe gas.

Avoid release of product into work area.

Use only lubricants and sealings approved for the specific gas service.

Messer Industriegase GmbH Messer- Platz 1 D - 65812 Bad Soden am Taunus Germany, 0049-(0)-6196 7760-200 DE - en

sulphur dioxide

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Reference number: D-SO2-113

Safe handling of the gas receptacle

: Refer to supplier's container handling instructions.

Do not allow backfeed into the container.

Protect containers from physical damage; do not drag, roll, slide or drop.

When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders.

Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use.

If user experiences any difficulty operating valve discontinue use and contact supplier.

Never attempt to repair or modify container valves or safety relief devices.

Damaged valves should be reported immediately to the supplier.

Keep container valve outlets clean and free from contaminants particularly oil and water. Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment.

Close container valve after each use and when empty, even if still connected to equipment.

Never attempt to transfer gases from one cylinder/container to another.

Never use direct flame or electrical heating devices to raise the pressure of a container.

Do not remove or deface labels provided by the supplier for the identification of the content of the container.

Suck back of water into the container must be prevented.

Open valve slowly to avoid pressure shock.

7.2. Conditions for safe storage, including any incompatibilities

Observe all regulations and local requirements regarding storage of containers.

Containers should not be stored in conditions likely to encourage corrosion.

Container valve guards or caps should be in place.

Containers should be stored in the vertical position and properly secured to prevent them from falling over.

Stored containers should be periodically checked for general condition and leakage.

Keep container below 50°C in a well ventilated place.

Store containers in location free from fire risk and away from sources of heat and ignition.

Keep away from combustible materials.

7.3. Specific end use(s)

None.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

sulphur dioxide (7446-09-5)		
Germany - Occupational Exposure Limits (TRGS 900)		
Local name	Schwefeldioxid	
AGW (OEL TWA) [1]	2.7 mg/m³	
AGW (OEL TWA) [2]	1 ppm	
Peak exposure limitation factor	1(I)	
Remark	AGS;Y	
Regulatory reference	TRGS900	

sulphur dioxide (7446-09-5)	
DNEL: Derived no effect level (Workers)	
Acute - local effects, inhalation	2.7 mg/m³
Long-term - local effects, inhalation	2.7 mg/m³

Messer Industriegase GmbH Messer- Platz 1 D - 65812 Bad Soden am Taunus Germany, 0049-(0)-6196 7760-200

sulphur dioxide

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Reference number: D-SO2-113

PNEC (Predicted No-Effect Concentration) : None established.

8.2. Exposure controls

8.2.1. Appropriate engineering controls

Provide adequate general and local exhaust ventilation.

Product to be handled in a closed system.

Systems under pressure should be regularily checked for leakages. Ensure exposure is below occupational exposure limits (where available). Gas detectors should be used when toxic gases may be released. Consider the use of a work permit system e.g. for maintenance activities.

8.2.2. Individual protection measures, e.g. personal protective equipment

A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk.

The following recommendations should be considered:

PPE compliant to the recommended EN/ISO standards should be selected.

• Eye/face protection : Wear goggles and a face shield when transfilling or breaking transfer connections.

Standard EN 166 - Personal eye-protection - specifications.

Provide readily accessible eye wash stations and safety showers.

• Skin protection

- Hand protection : Wear working gloves when handling gas containers.

Standard EN 388 - Protective gloves against mechanical risk, performance level 1 or higher.

Wear chemically resistant protective gloves.

Standard EN 374 - Protective gloves against chemicals.

Chloroprene rubber (CR).

Standard EN 511 - Cold insulating gloves.

- Other : Keep suitable chemically resistant protective clothing readily available for emergency use.

Standard EN943-1 - Full protective suits against liquid, solid and gaseous chemicals.

Wear safety shoes while handling containers.

Standard EN ISO 20345 - Personal protective equipment - Safety footwear.

• Respiratory protection : Gas filters may be used if all surrounding conditions e.g. type and concentration of the

contaminant(s) and duration of use are known.

Use gas filters with full face mask, where exposure limits may be exceeded for a short-term

period, e.g. connecting or disconnecting containers.

Recommended: Filter E (yellow).

Gas filters do not protect against oxygen deficiency.

Standard EN 14387 - Gas filter(s), combined filter(s) and standard EN136, full face masks .

Keep self contained breathing apparatus readily available for emergency use.

Self contained breathing apparatus is recommended, where unknown exposure may be expected, e.g. during maintenance activities on installation systems.

Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full

face mask.

• Thermal hazards : None in addition to the above sections.

8.2.3. Environmental exposure controls

Refer to local regulations for restriction of emissions to the atmosphere. See section 13 for

specific methods for waste gas treatment.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

- Physical state at 20°C / 101.3kPa
- Colour
: Gas
- Colourless.
Odour
: Pungent.

Odour threshold is subjective and inadequate to warn of overexposure.

pH : If dissolved in water pH-value will be affected.

Messer Industriegase GmbH Messer- Platz 1 D - 65812 Bad Soden am Taunus Germany, 0049-(0)-6196 7760-200 DE - en

sulphur dioxide

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Reference number: D-SO2-113

Melting point / Freezing point : -75.5 $^{\circ}$ C -75.5 $^{\circ}$ C

Boiling point : -10 °C

Flash point : Not applicable for gases and gas mixtures.

Flammability : Non flammable.

Lower explosion limit : Not available
Upper explosion limit : Not available
Vapour pressure [20°C] : 3.3 bar(a)
Vapour pressure [50°C] : 8.4 bar(a)
Density : Not applicable
Vapour density : Not applicable.

Relative density, liquid (water=1) : 1.5
Relative density, gas (air=1) : 2.3

Water solubility : Completely soluble.

Partition coefficient n-octanol/water (Log Kow) : Not applicable for inorganic products.

Auto-ignition temperature : Non flammable.

Decomposition temperature : Not applicable.

Viscosity, kinematic : No reliable data available.

Particle characteristics : Not applicable for gases and gas mixtures.

9.2. Other information

9.2.1. Information with regard to physical hazard classes

Explosive properties : Not applicable.

Oxidising properties : Not applicable.

Critical temperature [°C] : 158 °C

9.2.2. Other safety characteristics

Molar mass : 64 g/mol

Evaporation rate : Not applicable for gases and gas mixtures.

Gas group : Press. Gas (Liq.)

Other data : Gas/vapour heavier than air. May accumulate in confined spaces, particularly at or below

ground level.

SECTION 10: Stability and reactivity

10.1. Reactivity

No reactivity hazard other than the effects described in sub-sections below.

10.2. Chemical stability

Stable under normal conditions.

10.3. Possibility of hazardous reactions

None.

10.4. Conditions to avoid

Avoid moisture in installation systems.

10.5. Incompatible materials

Reacts with water to form corrosive acids.

May react violently with alkalis.

Reacts with most metals in the presence of moisture, liberating hydrogen, an extremely

flammable gas.

With water causes rapid corrosion of some metals.

Moisture.

For additional information on compatibility refer to ISO 11114.

10.6. Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition products should not

be produced.

sulphur dioxide

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Reference number: D-SO2-113

SECTION 11: Toxicological information

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

: Toxic if inhaled. **Acute toxicity**

Delayed fatal pulmonary oedema possible.

LC50 Inhalation - Rat [ppm] 1260 ppm/4h

: Causes severe skin burns and eye damage. Skin corrosion/irritation

Causes serious eye damage. Serious eye damage/irritation : No known effects from this product. Respiratory or skin sensitisation Germ cell mutagenicity : No known effects from this product. : No known effects from this product. Carcinogenicity : No known effects from this product. Toxic for reproduction: Fertility : No known effects from this product.

: Severe corrosion to the respiratory tract at high concentrations. STOT-single exposure

: No known effects from this product. STOT-repeated exposure

: Not applicable for gases and gas mixtures. **Aspiration hazard**

11.2. Information on other hazards

Toxic for reproduction: unborn child

Other information : The substance/mixture has no endocrine disrupting properties.

SECTION 12: Ecological information

12.1. Toxicity

Assessment : Classification criteria are not met.

EC50 48h - Daphnia magna [mg/l] 89 mg/l EC50 72h - Algae [mg/l] 48.1 mg/l LC50 96 h - Fish [mg/l] : No data available.

12.2. Persistence and degradability

Assessment : Not applicable for inorganic products.

12.3. Bioaccumulative potential

Assessment : Product is an inorganic gas with a low potential to bioaccumulate in aquatic species.

12.4. Mobility in soil

Assessment Because of its high volatility, the product is unlikely to cause ground or water pollution.

Partition into soil is unlikely.

12.5. Results of PBT and vPvB assessment

Assessment : Not classified as PBT or vPvB.

12.6. Endocrine disrupting properties

The substance/mixture has no endocrine disrupting properties.

12.7. Other adverse effects

Other adverse effects : May cause pH changes in aqueous ecological systems.

Effect on the ozone layer

Effect on global warming : No known effects from this product.

Messer Industriegase GmbH Messer- Platz 1 D - 65812 Bad Soden am Taunus Germany, 0049-(0)-6196 7760-200

sulphur dioxide

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Reference number: D-SO2-113

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Contact supplier if guidance is required.

Gas may be scrubbed in alkaline solution under controlled conditions to avoid violent

reaction.

Ensure that the emission levels from local regulations or operating permits are not

exceeded.

Refer to the EIGA code of practice Doc.30 "Disposal of Gases", downloadable at

http://www.eiga.eu for more guidance on suitable disposal methods.

Must not be discharged to atmosphere.

Return unused product in original container to supplier.

List of hazardous waste codes (from Commission

Decision 2000/532/EC as amended)

16 05 04 *: Gases in pressure containers (including halons) containing hazardous substances.

13.2. Additional information

External treatment and disposal of waste should comply with applicable local and/or national regulations.

SECTION 14: Transport information

14.1. UN number or ID number

In accordance with ADR / RID / IMDG / IATA / ADN

UN-No. : 1079

14.2. UN proper shipping name

: SULPHUR DIOXIDE Transport by road/rail (ADR/RID) Sulphur dioxide Transport by air (ICAO-TI / IATA-DGR) SULPHUR DIOXIDE Transport by sea (IMDG)

14.3. Transport hazard class(es)

Labelling

2.3: Toxic gases.

8: Corrosive substances.

14.6. Special precautions for user

Packing Instruction(s)

Transport by road/rail (ADR/RID) : P200

Transport by air (ICAO-TI / IATA-DGR)

Passenger and Cargo Aircraft : Forbidden.
Cargo Aircraft only : Forbidden.
Transport by sea (IMDG) : P200

Special transport precautions : Avoid transport on vehicles where the load space is not separated from the driver's

compartment.

Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in

the event of an accident or an emergency.
Before transporting product containers:
- Ensure there is adequate ventilation.
- Ensure that containers are firmly secured.
- Ensure valve is closed and not leaking.

Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
Ensure valve protection device (where provided) is correctly fitted.

14.7. Maritime transport in bulk according to IMO instruments

Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU-Regulations

Restrictions on use : None.

Other information, restriction and prohibition : Ensure all national/local regulations are observed.

DISCLAIMER OF LIABILITY

: Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out.

Details given in this document are believed to be correct at the time of going to press. Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted.

Annex to the safety data sheet

This Annex documents the Exposure Scenarios (ESs) related to the identified uses of the registered substance. The ESs detail protective measures for workers and the environment in addition to those described in sections 7, 8, 11, 12 and 13 of the SDS that are required to ensure that the potential exposure to workers and the environment remains within acceptable levels for each of the identified uses.

Table of contents of the Annex

Identified Uses	Es N°	Short title	Page
Formulation of mixtures in pressure receptacles	EIGA113- 1	Industrial uses, closed contained conditions	13
Calibration of analysis equipment	EIGA113- 1	Industrial uses, closed contained conditions	13
Transfilling in pressure receptacles	EIGA113- 1	Industrial uses, closed contained conditions	13
Metal treatment	EIGA113- 2	Industrial uses, closed and open conditions	17
Feedstock in chemical processes	EIGA113- 2	Industrial uses, closed and open conditions	17

1.2. Conditions of use affecting exposure 1.2.1. Control of environmental exposure: Product (article) characteristics Physical form of product Concentration of substance in product Amount used, frequency and duration of use (or the Regional use tonnage: Emission Days (days/year)	≤ 100 % From service life) ≤ 80000 t/yr 365 sures	I information	
1.2. Conditions of use affecting exposure 1.2.1. Control of environmental exposure: Product (article) characteristics Physical form of product Concentration of substance in product Amount used, frequency and duration of use (or to Regional use tonnage: Emission Days (days/year) Technical and organisational conditions and mean use appropriate abatement systems to ensure that to the control of the contr	≤ 100 % From service life) ≤ 80000 t/yr 365 sures he emission levels defined by local	I information	
1.2. Conditions of use affecting exposure 1.2.1. Control of environmental exposure: Product (article) characteristics Physical form of product Concentration of substance in product Amount used, frequency and duration of use (or the Regional use tonnage: Emission Days (days/year) Technical and organisational conditions and mean Use appropriate abatement systems to ensure that the regulations are not exceeded. No emissions to water. In case of emissions to water	≤ 100 % From service life) ≤ 80000 t/yr 365 sures he emission levels defined by local	I information	
1.2. Conditions of use affecting exposure 1.2.1. Control of environmental exposure: Product (article) characteristics Physical form of product Concentration of substance in product Amount used, frequency and duration of use (or to the second	≤ 100 % From service life) ≤ 80000 t/yr 365 sures the emission levels defined by local pH impact on the receiving water should	I information	

sulphur dioxide

Annex to the safety data sheet
Reference number: D-SO2-113
CAS-No.: 7446-09-5 Product form: Substance Physical state: Gas

Conditions and measures related to treatment of waste (including article waste)		
See section 13 of the SDS		
Other conditions affecting environmental exposure		
Closed systems are used in order to prevent unintended emissions		
1.2.2. Control of worker exposure:		
Product (article) characteristics		
Physical form of product	See section 9 of the SDS, No additional information	
Concentration of substance in product	≤ 100 %	
Amount used (or contained in articles), frequency a	and duration of use/exposure	
The actual tonnage handled per shift is not considered to influence the exposure as such for this scenario. Instead, the combination of the scale of operation and level of containment/automation (as reflected in the technical conditions) is the main determinant of the process-intrinsic emission potential.		
Exposure duration	≤ 8 h/day	
Covers frequency up to:	5 days/week	
Technical and organisational conditions and measu	ures	
Handle product within a closed system		
Ensure operatives are trained to minimise exposure		
Ensure supervision is in place to check that the RMMs are in place and are being used correctly and that the OCs are being followed		
Conditions and measures related to personal prote	ction, hygiene and health evaluation	
See section 8 of the SDS.		
Other conditions affecting workers exposure		
Indoor or outdoor use		
1.2.3. Control of worker exposure:		
Product (article) characteristics		
Physical form of product	See section 9 of the SDS, No additional information	
centration of substance in product ≤ 100 %		
	1	

sulphur dioxide

Amount used (or contained in articles), frequency and duration of use/exposure		
The actual tonnage handled per shift is not considered to influence the exposure as such for this scenario. Instead, the combination of the scale of operation and level of containment/automation (as reflected in the technical conditions) is the main determinant of the process-intrinsic emission potential.		
Exposure duration	≤ 8 h/day	
Covers frequency up to:	5 days/week	

Technical and organisational conditions and measures	
Handle product within a closed system	
During indoor processes or in cases where natural ventilation is not sufficient, LEV should be in place at points were emissions could occur. Outdoor, LEV is not generally required.	
Fill containers at dedicated fill points supplied with local extract ventilation.	
Drain down and flush system prior to equipment break-in or maintenance.	
Apply a good standard of general or controlled ventilation when maintenance activities are carried out.	
Ensure operatives are trained to minimise exposure	
Ensure supervision is in place to check that the RMMs are in place and are being used correctly and that the OCs are being followed	

Conditions and measures related to personal protection, hygiene and health evaluation	
See section 8 of the SDS.	

Other conditions affecting workers exposure	
Indoor or outdoor use	

1.3. Exposure estimation and reference to its source

1.3.1. Environmental release and exposure:

1.3.2. Worker exposure:

Route of exposure and type of effects	Exposure estimate	Assessment conditions	RCR
Dermal - Long-term - systemic effects		Since the product has corrosive properties, dermal exposure has to be minimised as far as technically feasible. A DNEL for dermal effects has not been derived. Thus, dermal exposure is not assessed in this exposure scenario	

sulphur dioxide
